Petition for Math Education

We, the undersigned, want Mountain View School District's Middle School math program to align with the California State Math Content Standards by Fall 2001. Experts recommend using McDougal Littell's Structure and Method (grades 6-8) or Prentice Hall (grade 7-8) in conjunction with a state approved grade 6 program to do this. Money from the state to purchase these programs is available now.

Mountain View School District has already committed to raising the bar for grades 2 through 5 by using textbooks that meet state standards, but not for our middle schools. Let's do the same in our middle schools.
